

# Quantity limits

## Premium Formulary

Utilization management updates  
January 1, 2025

Your pharmacy benefit plan has a quantity limits program that can help you get the best results from your medication therapy. With safe doses, quantity limits can also keep prescription drug costs lower for you.

### Determining quantity limits

Quantity limits are meant to lower the risk of overuse. Quantity limit rules are based on:

- Food and Drug Administration (FDA) approved uses
- Medication instruction labels
- Accepted or published clinical recommendations

### **The following medications have a new or revised quantity limit that will be covered.**

If your medication includes a quantity limit, this means there is a new limit to the amount of the drug(s) below that will be covered.

If you see your medication listed, we encourage you to talk with your doctor about your treatment and medication options. Where differences are noted between this list and your benefit plan documents, the benefit plan documents will rule. Some injectable medications listed may be covered by your medical benefit and not your pharmacy benefit. If you have questions about the quantity limits program, call the phone number on your member ID card.

## Premium Non-Specialty Quantity Limit

Therapy class	Medication name	Quantity limit
<b>Anti-infectives</b>		
Antibiotics	NUZYRA TAB 150 MG	1 course per fill, 2 fills per 365 days
	SIVEXTRO IV SOLN	6 vials per 30 days
